No part of this publication may be reproduced or transmitted in any form or by any means, electronic or mechanical, including photocopy, recording, or any information storage and retrieval system, without permission from the copyright owner.

The appearance of the code at the bottom of the first page of an article in this journal indicates the copyright owner's consent that copies of the article may be made for personal or internal use, or for the personal or internal use of specific clients. This consent is given on the condition, however, that the copier pay the stated per copy fee through the Copyright Clearance Center, Inc. (27 Congress Street, Salem, Massachusetts 01970), for copying beyond that permitted by Sections 107 or 108 of the U.S. Copyright Law. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotional purposes, for creating new collective works, or for resale. Copy fees for pre-1988 articles are as shown on the article title pages; if no fee code appears on the title page, the copy fee is the same as for current articles.

Contents of Volume 34

Number 1, May 1988

Takayuki Kudo, Nobuo Segawa, Ayako Ihjima, and Shigetaka Okajima. The Effect of Pictorial Context on Sentence Memory in Broca's and Wernicke's Aphasia 1

Christine M. Temple. Red Is Read But Eye Is Blue: A Case Study of Developmental Dyslexia and Follow-up Report 13

Eta I. Schneiderman and J. Douglas Saddy. A Linguistic Deficit Resulting from Right-Hemisphere Damage 38

Yves Joanette, Pierre Goulet, and Guylaine Le Dorze. Impaired Word Naming in Right-Brain-Damaged Right-Handers: Error Types and Time-Course Analyses 54

Rita Sloan Berndt, Aita Salasoo, Charlotte C. Mitchum, and Sheila E. Blumstein. The Role of Intonation Cues in Aphasic Patients' Performance of the Grammaticality Judgment Task 65

Kazuyoshi Fukuzawa, Motonobu Itoh, Sumiko Sasanuma, Tsutomu Suzuki, Yoko Fukusako, and Tohru Masui. Internal Representations and the Conceptual Operation of Color in Pure Alexia with Color Naming Defects 98

Agnes Petocz and George Oliphant. Closed-Class Words as First Syllables Do Interfere with Lexical Decisions for Nonwords: Implications for Theories of Agrammatism 127

M. A. Crary and K. M. Heilman. Letter Imagery Deficits in a Case of Pure Apraxic Agraphia 147

Z. Groswasser, C. Korn, I. Groswasser-Reider, and P. Solzi. Mutism Associated with Buccofacial Apraxia and Bihemispheric Lesions 157

Prathibha Karanth and G. N. Rangamani. Crossed Aphasia in Multilinguals 169

Papers to Appear in Forthcoming Issues 181

Number 2, July 1988

Carol McCleary. The Semantic Organization and Classification of Fourteen Words by Aphasic Patients 183

Erkki Vilkman, Jussi Niemi, and Unto Ikonen. Fragile X Speech Phonology in Finnish 203

Edwin C. Shuttleworth and Steven J. Huber. The Naming Disorder of Dementia of Alzheimer Type 222

John J. Sidtis and Bruce T. Volpe. Selective Loss of Complex-Pitch or Speech Discrimination after Unilateral Lesion 235

Jody Kreiman and Diana Van Lancker. Hemispheric Specialization for Voice Recognition: Evidence from Dichotic Listening ... 246

Sergio E. Starkstein, Marcelo Berthier, and Ramon Leiguarda. Bilateral Opercular Syndrome and Crossed Aphemia Due to a Right Insular Lesion: A Clinicopathological Study 253
F. Jacob Huff, Lisa Mack, Jeanne Mahlmann, and Sylvia Greenberg. A Comparison of Lexical—Semantic Impairments in Left Hemisphere Stroke and Alzheimer's Disease 262
William Milberg, Sheila Blumstein, and Barbara Dworetzky. Phonological Processing and Lexical Access in Aphasia 279
Michael W. O'Boyle and James Murray. Hemispheric Asymmetry in the Identification of Four-Letter Names Traced in the Right and Left Palms 294
Christine Chiarello, Sarah Nuding, and Alma Pollock. Lexical Decision and Naming Asymmetries: Influence of Response Selection and Response Bias 302
Adam W. Darkins, Victoria A. Fromkin, and D. Frank Benson. A Characterization of the Prosodic Loss in Parkinson's Disease 315
Maureen W. Lovett, Marilyn J. Ransby, and Roderick W. Barron. Treatment, Subtype, and Word Type Effects in Dyslexic Children's Response to Remediation 328
Notes and Discussion
David L. Share and Steven Schwartz. A Note on the Distinction between Attention Deficit Disorder and Reading Disability: Are There Group-Specific Cognitive Deficits? 350
Frank B. Wood, Rebecca H. Felton, and Idalyn S. Brown. The Dissociation of Attention Deficit Disorder from Reading Disability: A Reply to Share and Schwartz 353
Papers to Appear in Forthcoming Issues 359
Author Index for Volume 34 361

Information for Contributors

Brain and Language publishes original research articles, case histories, critical reviews, and scholarly notes; each contribution will be concerned with human language or communication (speech, hearing, reading, writing, or non-verbal modalities) related to any aspect of the brain or brain function. Each will have theoretical import, either formulating new hypotheses, or supporting or refuting new or previously established ones. The interdisciplinary focus includes the fields of neurology, linguistics, neurophysiology, psychology, neuroanatomy, psychiatry, neurosurgery, and speech pathology. Manuscripts of several different types are solicited: regular articles, single or multiple case history studies, critical reviews of books of interest to the journal's readership, and short (limited to under 10 pages typed) scholarly notes and comments discussing issues of topical interest.

Submission of Manuscripts. Manuscripts should be submitted to:

Brain and Language
Editorial Office
Seventh Floor
1250 Sixth Avenue
San Diego, California 92101

Original papers only will be considered. Manuscripts are accepted for review with the understanding that the same work has not been and will not be nor is presently submitted elsewhere, and that its submission for publication has been approved by all of the authors and by the institution where the work was carried out; further, that any person cited as a source of personal communications has approved such citation. Written authorization may be required at the Editor's discretion. Articles and any other material published in *Brain and Language* represent the opinions of the author(s) and should not be construed to reflect opinions of the Editor(s) and the Publisher.

Authors submitting a manuscript do so on the understanding that if it is accepted for publication, copyright in the article, including the right to reproduce the article in all forms and media, shall be assigned exclusively to the Publisher. The Publisher will not refuse any reasonable request by the author for permission to reproduce any of his or her contributions to the journal.

Form of Manuscript. Authors should submit manuscripts in *quadruplicate* (one original and three copies), typewritten, double-spaced on one side of 8½ × 11-in. white paper. The original and two copies of all artwork, tabular material, photographs, etc., must also be included. All pages should be numbered consecutively.

Page 1 should contain the article title, author(s) name(s) and affiliation(s), abbreviated form of the title for the running page heading (not to exceed 35 characters including letters and spaces), and the complete mailing address of the author to whom all correspondence should be sent. *Page 2* should contain a short *abstract* of approximately 100 words.

Papers must be written in English. Language data may be given in English when clearly identifiable, otherwise it should be transcribed into the phonetic alphabet of the International Phonetic Association (IPA).

Figures should be numbered in order of appearance (with Arabic numerals) and should have short descriptive captions (typed double-spaced on a separate page). Line drawings must be originals in black India ink on white paper, on polyester drafting film, or comparable glossy black and white photographs. Lettering should be uniform, professionally done, and large enough to be fully legible after a 50–60% reduction in printing. Illustrations in color can be accepted only if the authors defray the cost.

Tables should be numbered in order of appearance (with Arabic numerals): they should be typed double-spaced on a separate page. Each table should have a short descriptive title typed (double-spaced) above the table. Footnotes to tables (indicated by superscript lowercase letters,[a,b], etc.) should be typed (double-spaced) at the end of the table. Keep in mind the dimensions of the journal when planning the number of columns in a table.

Footnotes to the text should be kept to a minimum; when necessary, they should be indicated by superscript Arabic numerals,[1,2], etc., cited consecutively throughout the article, starting with the title. They should be typed double-spaced on a separate page.

References should be cited in the text by surname of the author and the publication date in parentheses, e.g., Goldstein (1980) or (Russell & Espir, 1981). If more than one paper was published by the same author in a given year, the correct style is Broca (1982a) or (Broca, 1982b).

References should be listed alphabetically, typed double-spaced at the end of the article. All references cited in the text must be listed at the end of the paper. Journal titles should be written out in full, not abbreviated. Note the following examples.

Fromkin, V. 1980. *Errors in linguistic performance*. New York: Academic Press.

Efron, R., Snyder, E., Yund, E. W., & Martin, F. 1983. Central auditory processing. VI. Detecting ear dominance by evoked potentials. *Brain and Language*, **20,** 54–64.

Bryden, M. P. 1978. Strategy effects in the assessment of hemispheric asymmetry. In G. Underwood (Ed.), *Strategies of information processing*. New York/London: Academic Press.

(Use underlining for journal and book titles only.)

Proofs. Proofs will be sent to the designated author, with a reprint order form. Authors will be charged for alterations in excess of 10% of the cost of composition.

Reprints. Fifty (50) reprints without covers will be provided free of charge for articles. Additional reprints may be purchased; an order form will be included with proofs.
